

ANKUSH KUMAR SINGH

FRONT-END DEVELOPER | RESPONSIVE WEB DEVELOPMENT | DESIGN SYSTEMS & COMPONENT LIBRARIES

+91-9618538848 | ankush.k.singh9618@gmail.com | linkedin.com/in/aks9618 | github.com/ankush9618 | ankushkumar-portfolio.vercel.app

Targeting Front-end Developer opportunities to leverage expertise in Responsive Web Development, UI Engineering, Component-Based Architecture and Front-End Optimization while contributing to delivery of scalable, user-centric web applications and modern digital experiences.

PROFILE SUMMARY

Front-End Developer with **2.8+ years** of experience building responsive, enterprise-scale web applications in **React.js, Next.js, TypeScript, and JavaScript (ES6+)**. Core contributor to a Next.js UI component library adopted by **100+** developers, cutting development effort by **~60%** and improving UI consistency. Recognized **UI Subject Matter Expert (SME)** driving front-end architecture, defect resolution (**250+ UI defects, 200+** SonarQube issues), and cross-team best practices - contributing to a **20-30%** reduction in overall defect volume while translating Figma designs into pixel-perfect, API-integrated interfaces.

CORE COMPETENCIES

- Front-end Application Development
- User Interface (UI) Engineering
- Responsive Web Development
- Component-Based Architecture
- Design System Development
- Front-end Performance Optimization
- State Management & Data Flow
- API Integration & Data Consumption
- Cross-Browser Compatibility
- Code Quality & Technical Debt Reduction

WORK EXPERIENCE

Accenture, Kolkata, India Nov 2023 - Present

Growth Path: Associate Software Engineer to Software Engineer

Software Engineer Mar 2026 - Present

- Engineered HaloUtils, a Next.js UI library adopted by 100+ developers across a large-scale leading telecom giant of UK program, leveraging Server Components by default and scoping Client Components to interactive elements only - improving development efficiency by 60% & reducing defect density by 50% through reusable UI architecture and standardized components.
- Orchestrated system-wide inline validation strategy, reducing redundant API calls by ~30% and enhancing application responsiveness, scalability and front-end performance.
- Represented front-end engineering as a UI SME, driving architectural decisions, enforcing best practices, performing defect analysis and owning critical UI solutioning across high-impact initiatives.

Associate Software Engineer Nov 2023 - Feb 2026

- Delivered 3-4 Change Requests per quarter with 100% on-time execution, managing complete UI lifecycle including development, back-end integration and pixel-perfect translation of Figma designs.
- Remediated 250+ UI defects and 200+ SonarQube issues, strengthening code quality, improving maintainability by 10-15% and contributing to a 20-30% reduction in overall defect volume and long-term technical debt prevention.
- Architected reusable UI components using HTML, CSS, JavaScript and jQuery, accelerating development cycles and reducing engineering effort by 20-30%.
- Prototyped multiple UI proof-of-concepts to validate requirements early, improving design decision accuracy & reducing downstream rework.
- Championed code quality governance through peer reviews, enforcing UI standards and ensuring consistency across the front-end codebase.
- Led resolution of critical UI issues during leadership absence, providing end-to-end ownership, root-cause analysis & stakeholder coordination.

TECHNICAL & OTHER SKILLS

- **Web Technologies:** Next.js, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, jQuery, Tailwind CSS, Bootstrap
- **State & Data:** React Hooks, Redux, React Query
- **Back-end & DB:** Node.js, Express.js, MySQL, MongoDB, Restful APIs
- **Languages:** JavaScript, TypeScript, C, C++, Java, Python
- **Tools:** Git, GitHub, Figma, SonarQube, Vercel, Render, VS Code
- **Soft Skills:** Problem Solving, Leadership, Code Review, Team Collaboration, Adaptability

PROJECTS

HaloUtils - UI Component Library

Tech-Stack: Next.js, Tailwind CSS, Redux, React Query, Figma

- Built and maintained a scalable Design System component library, including Buttons, Banners, Icons and Tooltips, adhering to Figma design specifications for typography, spacing and consistency.
- Developed productivity tools such as a PR File Generator and custom ESLint rules to automate code quality checks and enforce engineering standards across teams.
- Implemented drag-and-drop functionality for banner and popup components, enabling teams to assemble and reorder UI elements independently, reducing turnaround time and developer dependency.
- Leveraged Redux and React Query for efficient state management and data caching, enabling 100+ developers to reduce development effort and accelerate delivery timelines by 60%.

InventoryPro – Inventory Management System

Tech-Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed full-stack MERN inventory management platform with CRUD functionality, role-based access control & real-time inventory updates.
- Integrated Cloudinary for media management and deployed the application using Vercel and Render, delivering a fully responsive and production-ready user experience.

EDUCATION DETAILS

B.Tech. in Electronics and Communication Engineering CMR Technical Campus, Hyderabad, India	Aug 2019 – Apr 2023 CGPA: 8.67
---	-----------------------------------

CERTIFICATIONS

- Reinvention with Agentic AI Learning Program – Accenture
- Front-end Developer (React) & JavaScript (Intermediate) – HackerRank
- Master React from Beginner to Advanced – CodeCompile
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle
- Web Development Certification – Internshala
